

Education and Certifications

- **B.Sc. Information Technology**, Stamford International University.
GPA 3.78 / 4.00

Nov 2022 – Dec 2025
Thailand, Bangkok

Work Experience

Software Engineer Intern

Omise
Thailand, Bangkok

June 2025 – December 2025

- Shipped 3–5 production UI bug fixes across the merchant dashboard and internal tools, including an i18n bug where the payment page ignored the user’s language setting.
- Corrected i18n language handling so the payment flow and dashboard rendered in the right language per user settings.
- Migrated Next.js 14 to 15 and upgraded Buildkite CI with the required build-plugin config, keeping pipelines on supported versions.
- Ran POCs for LaunchDarkly feature flags, Mixpanel analytics, and an AWS QuickSight BI dashboard; added Jest tests and SonarQube checks across Ruby and JavaScript and React.

Projects

- **Kalifinder** — AI product search widget for Shopify / WordPress (Team Project)
 - Built a Shopify/WordPress sync pipeline with idempotent upserts; used OpenSearch for full-text, faceted, and k-NN vector search in one round-trip, plus Bedrock image embeddings for “find similar products.”
 - Deployed on ECS Fargate with auto-scaling; hosted the React widget on S3 + CloudFront, with Terraform managing all AWS infra and SQS workers handling async embeddings.
- **Cash Wise** — full-stack personal finance app (github.com/Long104/Senzen · Live:<https://senzen.pantorn.site/>)
 - Expense tracker built with Next.js, React Query, and Zustand; Go (Fiber) + GORM over PostgreSQL backend with OAuth/JWT auth.
 - Containerized with Docker, deployed on Vercel with CI/CD, orchestration validated locally with Kubernetes.
- **AI-Clipboard-Extension** — cross-browser AI clipboard tool (github.com/Long104/AI-Clipboard-extension)
 - Chrome & Firefox extension built with Plasmo + React from one codebase.
 - Routed clipboard text to LLaMA 3.3 via Cloudflare AI Workers, backend on Cloudflare Workers + Hono.

Technologies and Languages

- Languages: **TypeScript, JavaScript, Go, Python**, SQL, Java,, Ruby
- Frameworks: **Next.js, React, Tailwind CSS, Fiber, Express**, Socket.io, Gin, Hono, Mantine
- Databases: **PostgreSQL**, MySQL, MongoDB
- Cloud & DevOps: **Docker, cloudflare**,Vercel,ECS, S3, CloudFront, Kubernetes,Terraform, GitHub Actions, Buildkite,
- Testing & Tools: **Git, GORM, Prisma, Jest, Vitest**, Playwright, Mixpanel, LaunchDarkly, SonarQube

Open Source Contributions

- **Contributed to [ritsth/job-autofill-extension](#) — merged PRs #64 & #65:**
added unit tests for the cover-letter filename generator, fixed a trailing-hyphen slicing bug, and added .editorconfig for consistent formatting.
- **Contributed to [turanheydarli/bani.sh](#) — merged PR #7:**
fixed a bug where the --version / -v flags failed to print, extracted shared helpers, and added unit tests for subcommand detection.

Extracurricular

- **DOCKER Workshop – Stamford International University | Technical Assistant:** With the coding club we organized a workshop at Stamford University with a theory and practical session.
- **HTML CSS JS Workshop - Stamford International University | Speaker and Technical Assistant**
Organized Basic of how HTML, CSS, and Javascript work to render on the website and show case of how it’s work all together by coding.
- **STYLE-WAR CSS Battle – Stamford International University:** Co-organized coding club CSS competition.
